DESIGN VERIFICATION PLAN AND REPORT

Supplier Name _____ Part Number _____ Revision _____ Part Description _____

Specification & Method	**Test Description**	**Acceptance Criteria**	**Test Stage**	**Target Requirements**	**Sample Type**	**Sample Level**	**Actual Results**	**Additional Notes**
Specification governing test & test method used (if applicable).	Provide a brief desription of each test. **Include SC/CC/KPC Symbol** List the Customer or designated symbol if applic., e.g. KPC	Specify test targets and/or pass/not pass criteria. e.g. cycles, miles, volts, minimum value, no breakage, etc.	ED = Engineering Devel't Testing DV = Design Verification PV = Production Validation CCT = Continued Compliance Testi	State required probability or reliability and confidence of meeting acceptance criteria, e.g. R90 C90, or All must pass.	Describe the sample to be tested (see sample level)	A = Prototype (Handmade) B = Prototype (Tooled) C = Production Tool (Not Process) D = Production Tool and Process	List results in terms of reliability or probability as appropriate	Describe or elaborate on sub-phases
